

VenueVision® Dealership Solutions

Vehicle Status Board

Vehicle Status Board - Web Version

Vehicle Status Board - Service waiting area

The Vehicle Status Board provides a direct benefit to CSI particularly on the issue of keeping customers informed as to the status of their vehicle. Although originally intended for customer benefit, service advisors and all levels of management are also using this dashboard to monitor vehicle status including comebacks and other problem RO's. The system also has the capability to automatically email customers when the status of the vehicle changes. This solution can be easily integrated into your existing dealership management and back end systems (Examples include Reynolds, ADP, Quorum, ...etc).

VenueVision®TV

VenueVisionTV - Show room screens

VenueVisionTV - Service waiting area

VenueVisionTV Provides timely information, entertainment and advertising to your clients. The show room channel promotes the latest models and campaigns as well as warranty and used car information. The Service channel informs clients about the latest service offerings and emphasizes the importance of vehicle maintenance. A better informed customer is a happier customer.
